Subject: RE: Report out on today's activities

Steve – Do we have a rough draft for the Manchester Executive Summary? I figure we will get questions today and want to make sure we are ready.

We should be able to complete the additional facilities today and if we have a rough draft we should be able to close this out.

Subject: Report out on today's activities

Report out on Activities today:

The four EPA 6EN field personnel deployed to Houston (serving as technical specialists under the ESF-10 OSC) conducted total VOC area monitoring at a city park near Galena Park High school and around the United States Gypsum facility. No significant readings of VOCs were observed at either location. In the afternoon, the team monitored the following facilities with the TAGA: Huntsman, Eco Services Operations, Goodyear, Flint Hills Resources-Houston

Chemical Plant, TPC Group-Houston Plant. In addition to TAGA monitoring, the EN field team did additional total VOC monitoring along the Eco Services Operations fence line and in the community adjacent to Eco Services Operations. No significant reading of VOCs were observed.

Activities planned for tomorrow include monitoring the following facilities using the TAGA: Southwest Shipyard - Brady Island, Channel Energy Center, Texmark Chemicals, VOPAK - Galena Park Terminal, United States Gypsum, and Targa Resources - Galena Park Terminal.
